

MIHIR DONGARE

✉ mihirdongare1045@gmail.com [in mihir-dongare](#) ☎ 8830889338 📍 Nashik, Maharashtra

TECHNICAL SKILLS

- Languages and Web: JavaScript, HTML, CSS
- Backend: Node.js, Express.js, RESTful API Development, Microservices, Layered Architecture
- Databases: RDBMS, SQL, Sequelize ORM
- DevOps tools: Linux, Apache, Nginx, Systemd, Bash Scripting, SSH, Ansible, Docker, AWS, Git/Github
- Coursework: Object-Oriented Programming, RDBMS, Operating System, Networking Concepts

PERSONAL PROJETS/ HANDS-ON

Flight Booking Application | Node.js, Express.js, MySQL, Sequelize, Node-cron, BullMQ, JWT Auth

Developed a full-featured flight booking backend application with secure authentication, dynamic search, and real-time booking management.

- Created dynamic flight search, filtering, and pagination features to enhance user experience.
- Implemented JWT-based authentication, Bcrypt hashing, CORS, and middleware for secure route protection.
- Managed bookings with seat availability checks, booking expiration, and concurrency locks to prevent overbooking.
- Implemented Sequelize transactions with MySQL to manage complex booking and payment workflows, ensuring atomic operations, maintaining data integrity, and performing rollback on failures.
- Enforced role-based access control (RBAC) for admins and users.
- Designed a layered architecture with clear separation of concerns and built a reusable CRUD class to streamline and optimize database operations.
- Implemented robust error handling using custom AppError class to ensure reliable application behavior and clear error reporting.

PROFESSIONAL EXPERIENCE

Linux System Administrator (Service Availability)

Nov 2022 - Present

Aress Software Solutions and Education Technologies

- Performed system-level troubleshooting, performance monitoring, and optimization in production Linux environments, reducing downtime by 20% and improving stability.
- Handled manual and automated server provisioning for 20+ servers using Ansible playbooks, ensuring secure, scalable production environments.
- Managed Apache, Nginx, and MySQL servers with proxy setups, load balancing, caching, and connection management, ensuring 99.9% uptime.
- Configured and maintained virtualization platforms, networking, DNS, and firewall settings for secure, efficient communication across physical and virtual servers.
- Implemented backup solutions and Disaster Recovery (DRM) processes using R1Soft, ensuring data integrity, fast recovery, and minimal downtime.
- Automated routine tasks via Bash scripting and cron jobs, improving operational efficiency by 30%.
- Ensured high availability and fault tolerance by monitoring system health with Zabbix, Grafana, and Prometheus, responding to alerts, and applying proactive measures.
- Collaborated with development teams to debug application-level issues, reducing MTTR by 25%.

EDUCATION

Bachelor of Computer Applications (BCA)

2018-2021

Commerce, Management & Computer Science College, Nashik, affiliated to Savitribai Phule Pune University (SPPU), Pune
